Morgan

I just wanted to send you a message to let you and the whole group there at Cirexx know that these boards look fantastic. There are some really small components on there and everything looks clean and well done.

We're still working on software debug, but the boards check out, we've gotten positive responses from the IC's and everything looks good. Thank you for the high quality work and very fast turn time. Its always a pleasure to work with Cirexx.

I'll be sending on a new design sometime next week for your review, but until then, I hope you all enjoy your Thanksgiving weekend!

Thanks!  
-Dan
