**Subject:** Thank You

David,

On behalf of the Intel team we want to extend our appreciation to the Cirexx team. In just 6 business days we went from design input through layout , board fab, assembly, and shipment on 2 designs. This effort went smoothly without any issues. We appreciate you working with us and delivering the product while Po's were still in work. We have built up 4 of the units through mechanical assembly and everything is working fine. We still have additional tests to run, but so far, so good.

In our team meeting the unanimous comment was that Cirexx was a great partner and that this effort was completed faster than our historical experience would have predicted possible. So again, thank you.

Regards,

John [REDACTED]
