

Dear Mr. [REDACTED]

We would like to recognize the hard work and dedication your company (CiREXX) has demonstrated in supporting [REDACTED] technology development. By ensuring that our two sets of prototype boards were delivered by our end of year due date, the programs related to these two prototypes will stay on track. Your company achieved this result in spite of several challenges including delays in getting critical materials from Rogers and Taconic that were needed to manufacture the two prototypes sets. We also want to thank CiREXX for the quick turn around on press-thickness studies that effected several designs involving the technology that we are developing.

Your company demonstrates a strong commitment to customers and demonstrated can-do attitude.

In recognition please accept this [REDACTED] to your use and please pass along our thanks at [REDACTED] to all of CiREXX employees involved in this effort.

Sincerely,

Dr. Charles [REDACTED]
Engineering Lead [REDACTED]
[REDACTED] Research [REDACTED] Technologies
